Key members +20

Mindaugas Markevicius (Chief executive officer)

Successful investor and consultant in several business sectors - digital production, digital marketing and sporting goods manufacturing. Executive experience in live global event organization. European level sports tournament planning and staging.

- Serial Entrepreneur
- Passionate team leader
- Crypto enthusiast
- Seasonal gamer

Tomas Kacevicius (Chief Operating Officer)

Digital marketing and social media expert with 13 years' extensive experience in Facebook and Shopify plus further web and ads development.

Implemented digital solutions for brands such as

- Ferrari Leisure Park
- Red Bull
- Volvo
- MTV
- Nokia
- Maybeline
- Nissan
- Phillips
- Vodaphone
- Ford
- Jaguar
- Barclay card
- Swarowski
- Jeep
- Starbucks
- Eurostar

Mantas Grigaitis (Creative director)

Digital artist and designer with extensive experience in creating moving image content for video games, film, art and non-profit organisations.

Video games

- Call of Duty Black Ops Cold War
- Call of Duty Black Ops 4
- Unravel Two
- Eve Valkyrie
- Titanfall 2
- Homefront: The Revolution
- The Crew
- Need for Speed 2015
- The Division
- League of Legends
- Assassin's Creed Chronicles
- The Deep
- Need for Speed Rivals
- Titanfall
- Killzone Mercenary
- Call of Duty Ghosts
- Call of Duty Black Ops 2

Gediminas Tarasevicius (Game design - consultant)

Video games for life! A game designer with 10+ years of professional game industry experience.

Director at Lithuanian Game Developers Association.

Head of studio at No Brakes Games Vilnius, Lead game designer at Nordcurrent.

Video games

- Hungry Invaders
- Dating Puzzle
- Pocket Styler
- Happy Clinic
- Monster Buster: World Invasion

- Kakes Makes nuotykiai
- Jelly Love

Marius Podvoiskis (Chief Technology Officer)

Leads our engineering team and is responsible for our technical strategy and engineering operations.

He previously worked as a Lead software engineer at Firepush & various digital agencies.

About Wizardia

Wizardia is a Play-to-Earn (P2E), online role-playing strategy game built on three core gameplay pillars:

- innovative, turn-based combat.
- player decision-driven game evolution.
- base-building with sophisticated economy model.

In line with exciting, new technologies, we have designed the Wizardia world, with Non-Fungible Tokens (NFTs) acting as its very core.

These NFTs are completely unique virtual assets that have both in-game purposes and hold real-world value outside of the virtual realm.

How to earn?

Cashback Wizardia Tokens ($WZRD)

A utility token that also acts as a currency that can be earned and spent within the game itself.

Time Investments

Farming or producing valuable in-game resources and selling them for Wizardia Tokens to other players.

Wonder Constructions

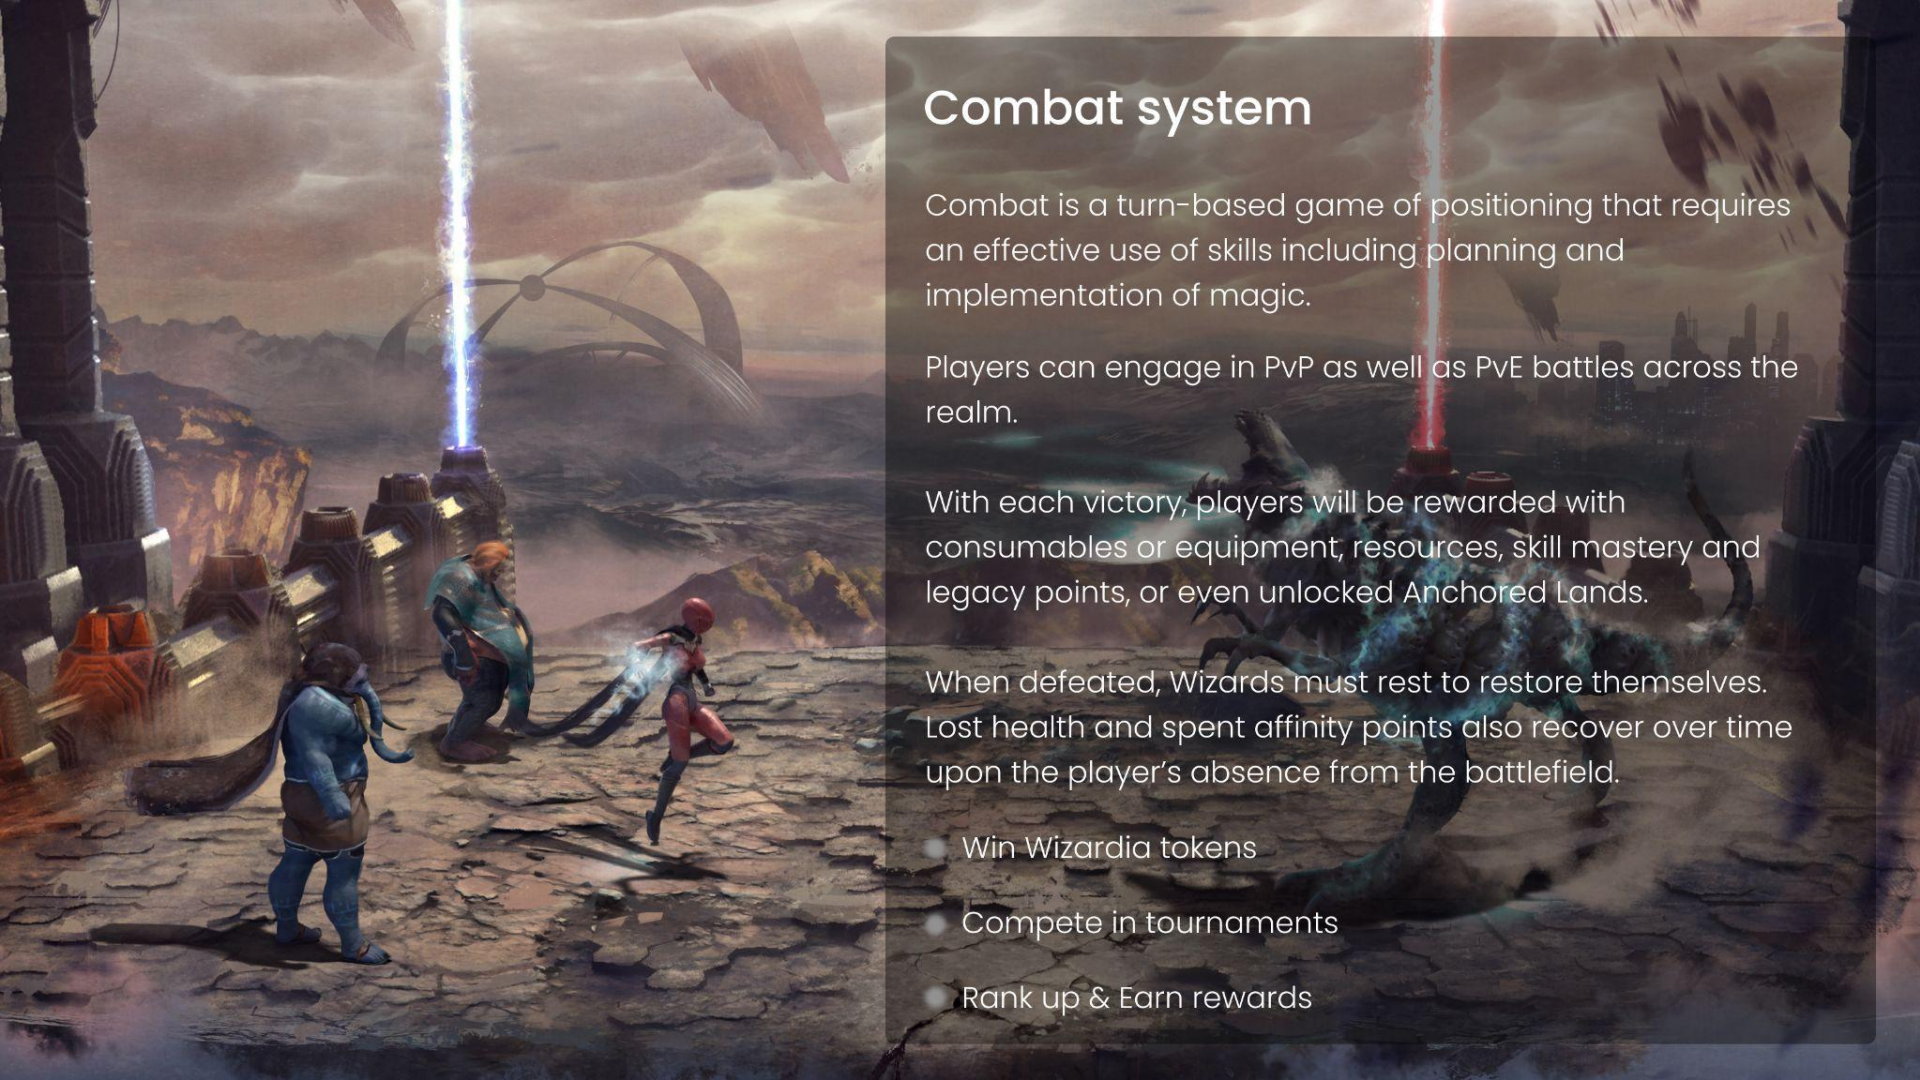
Realm Wonders are NFT buildings that act as a source of power and passive income. They also come as Founder's NFTs.

Powerful Wizards

Increasing power and value of your Wizards (in-game characters) through tasks, and trading them as an NFT or leaving their legacies to successors.

Protospell Discoveries

NFTs that players can take advantage or sell.



Combat system

Combat is a turn-based game of positioning that requires an effective use of skills including planning and implementation of magic.

Players can engage in PvP as well as PvE battles across the realm.

With each victory, players will be rewarded with consumables or equipment, resources, skill mastery and legacy points, or even unlocked Anchored Lands.

When defeated, Wizards must rest to restore themselves. Lost health and spent affinity points also recover over time upon the player's absence from the battlefield.

- Win Wizardia tokens
- Compete in tournaments
- Rank up & Earn rewards

Base building

Players who own an Anchored Land can custom build a base for their Wizards to call home and will earn a passive income of tokens and resources.

Different buildings serve different purposes that will influence building strategy.

Some Anchored Lands give the player a source of passive resource farming, while others are required to produce Spells from resources (or could even unlock other capabilities such as trading and fast-travel).

- Grow crops
- Farm resources
- Fight lurking threats
- Build, expand and explore

Crafting

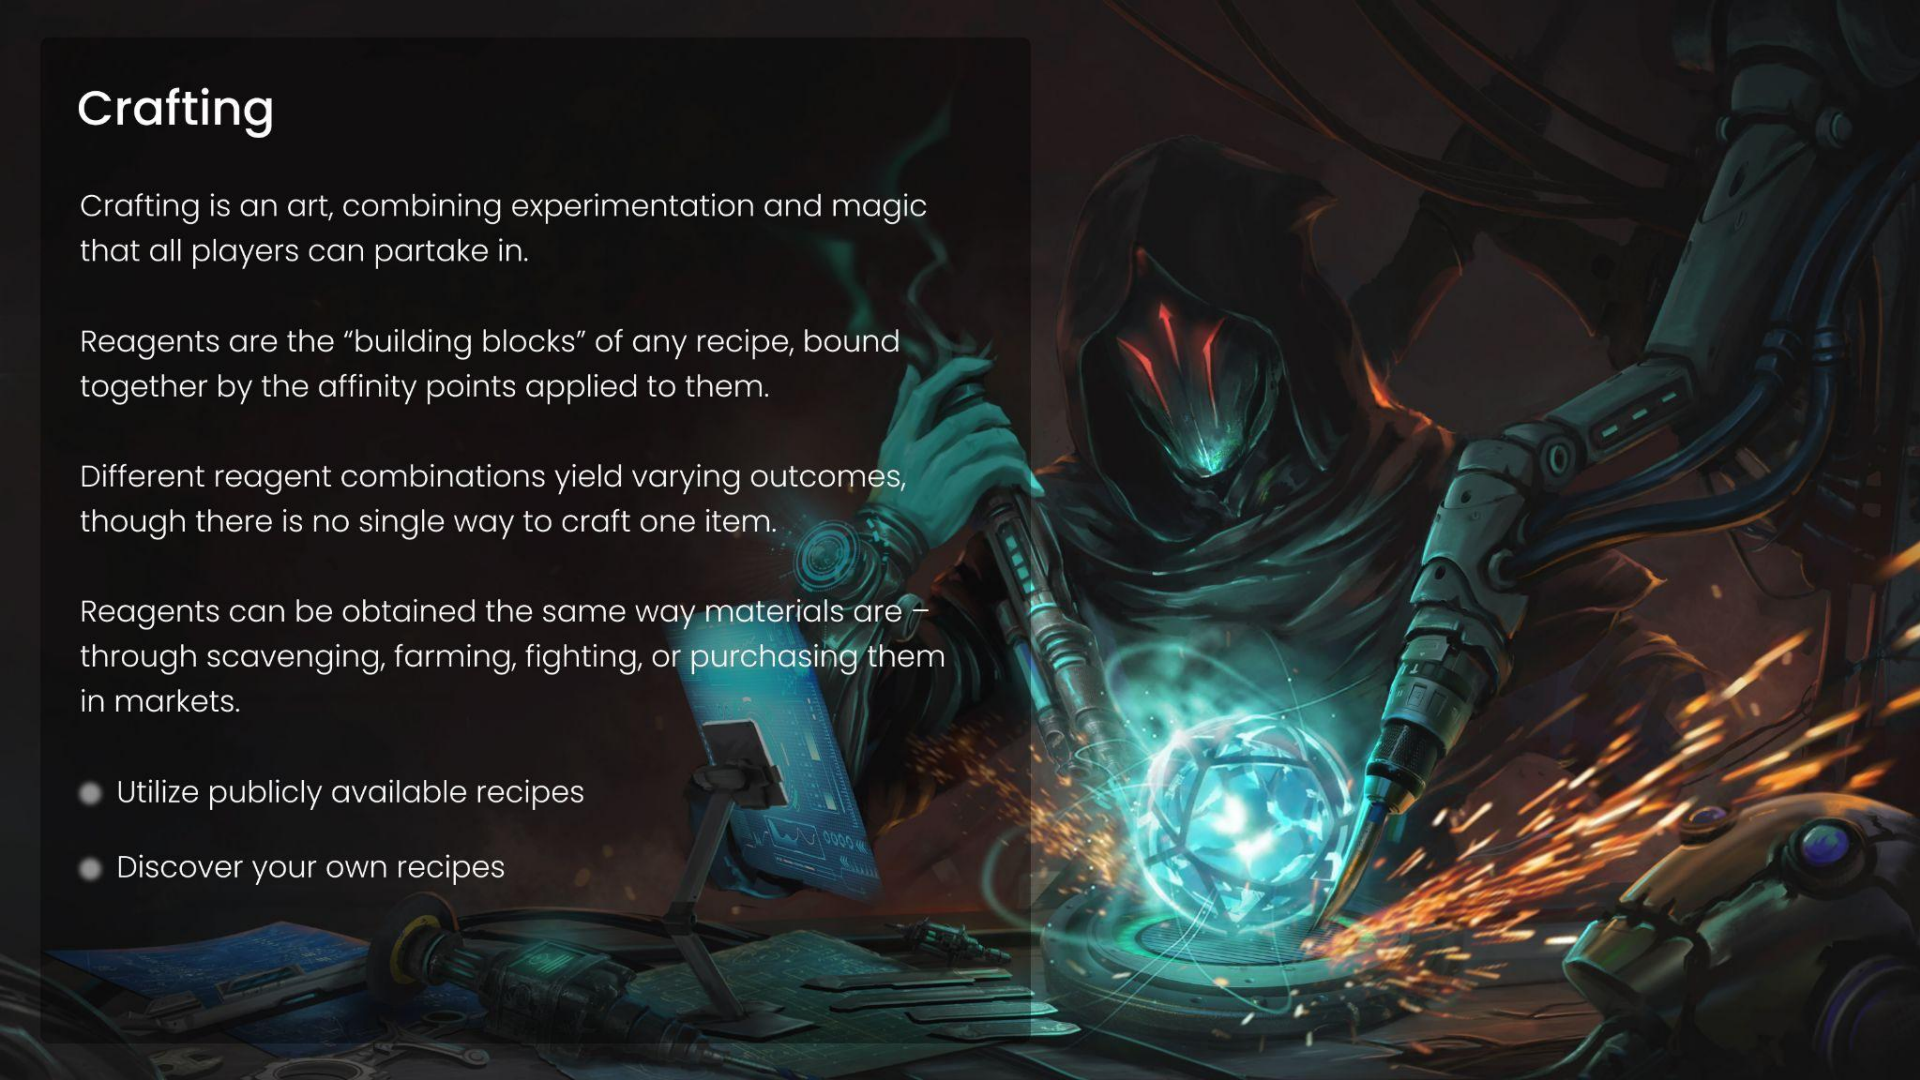
Crafting is an art, combining experimentation and magic that all players can partake in.

Reagents are the “building blocks” of any recipe, bound together by the affinity points applied to them.

Different reagent combinations yield varying outcomes, though there is no single way to craft one item.

Reagents can be obtained the same way materials are – through scavenging, farming, fighting, or purchasing them in markets.

- Utilize publicly available recipes
- Discover your own recipes



Secret project

Realm Wonder NFT

Keep the power to surpass others

Constructing Realm Wonders like Teleportation portals or Fountains of Youth unlocks unique capabilities exclusively available to owners.

Share the power for a price

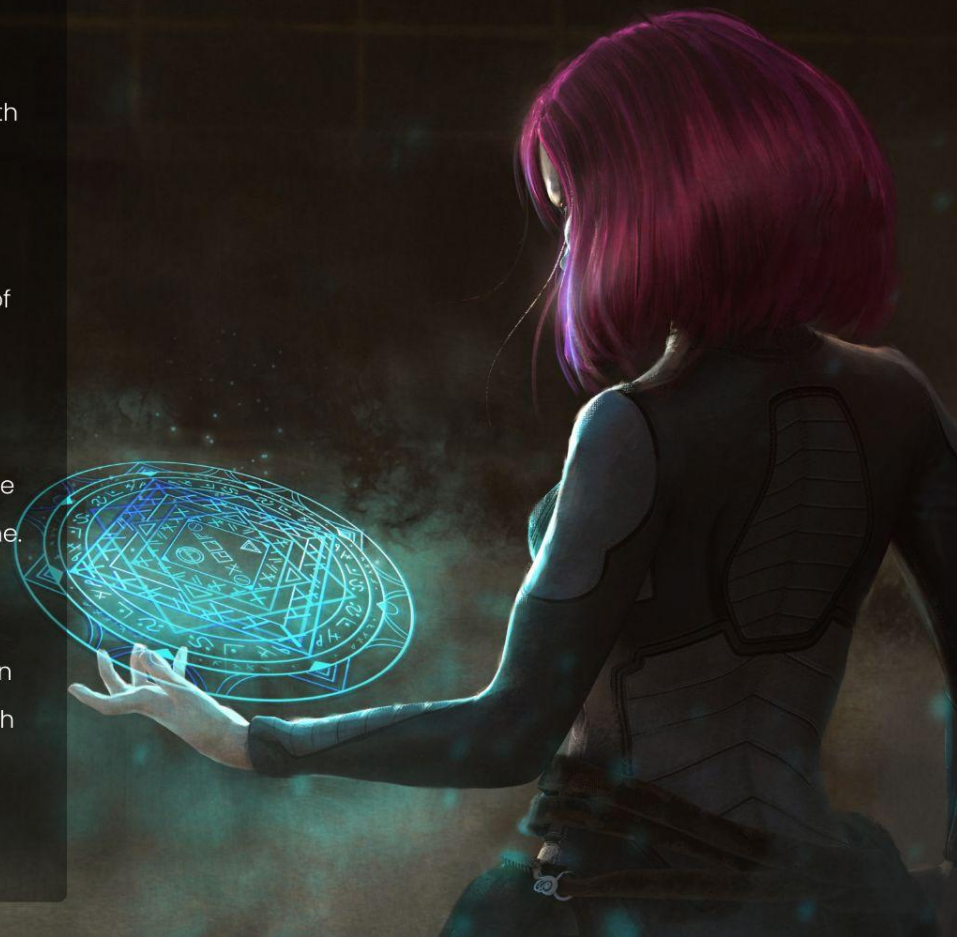
Realm Wonders grant positive effects upon the owner or fulfill the desires of other players - for a price.

Passive income for Founding Players

Founding Players are contributors of extremely valuable Realm Wonders like the Arena. They own a fraction of the whole NFT and receive passive income.

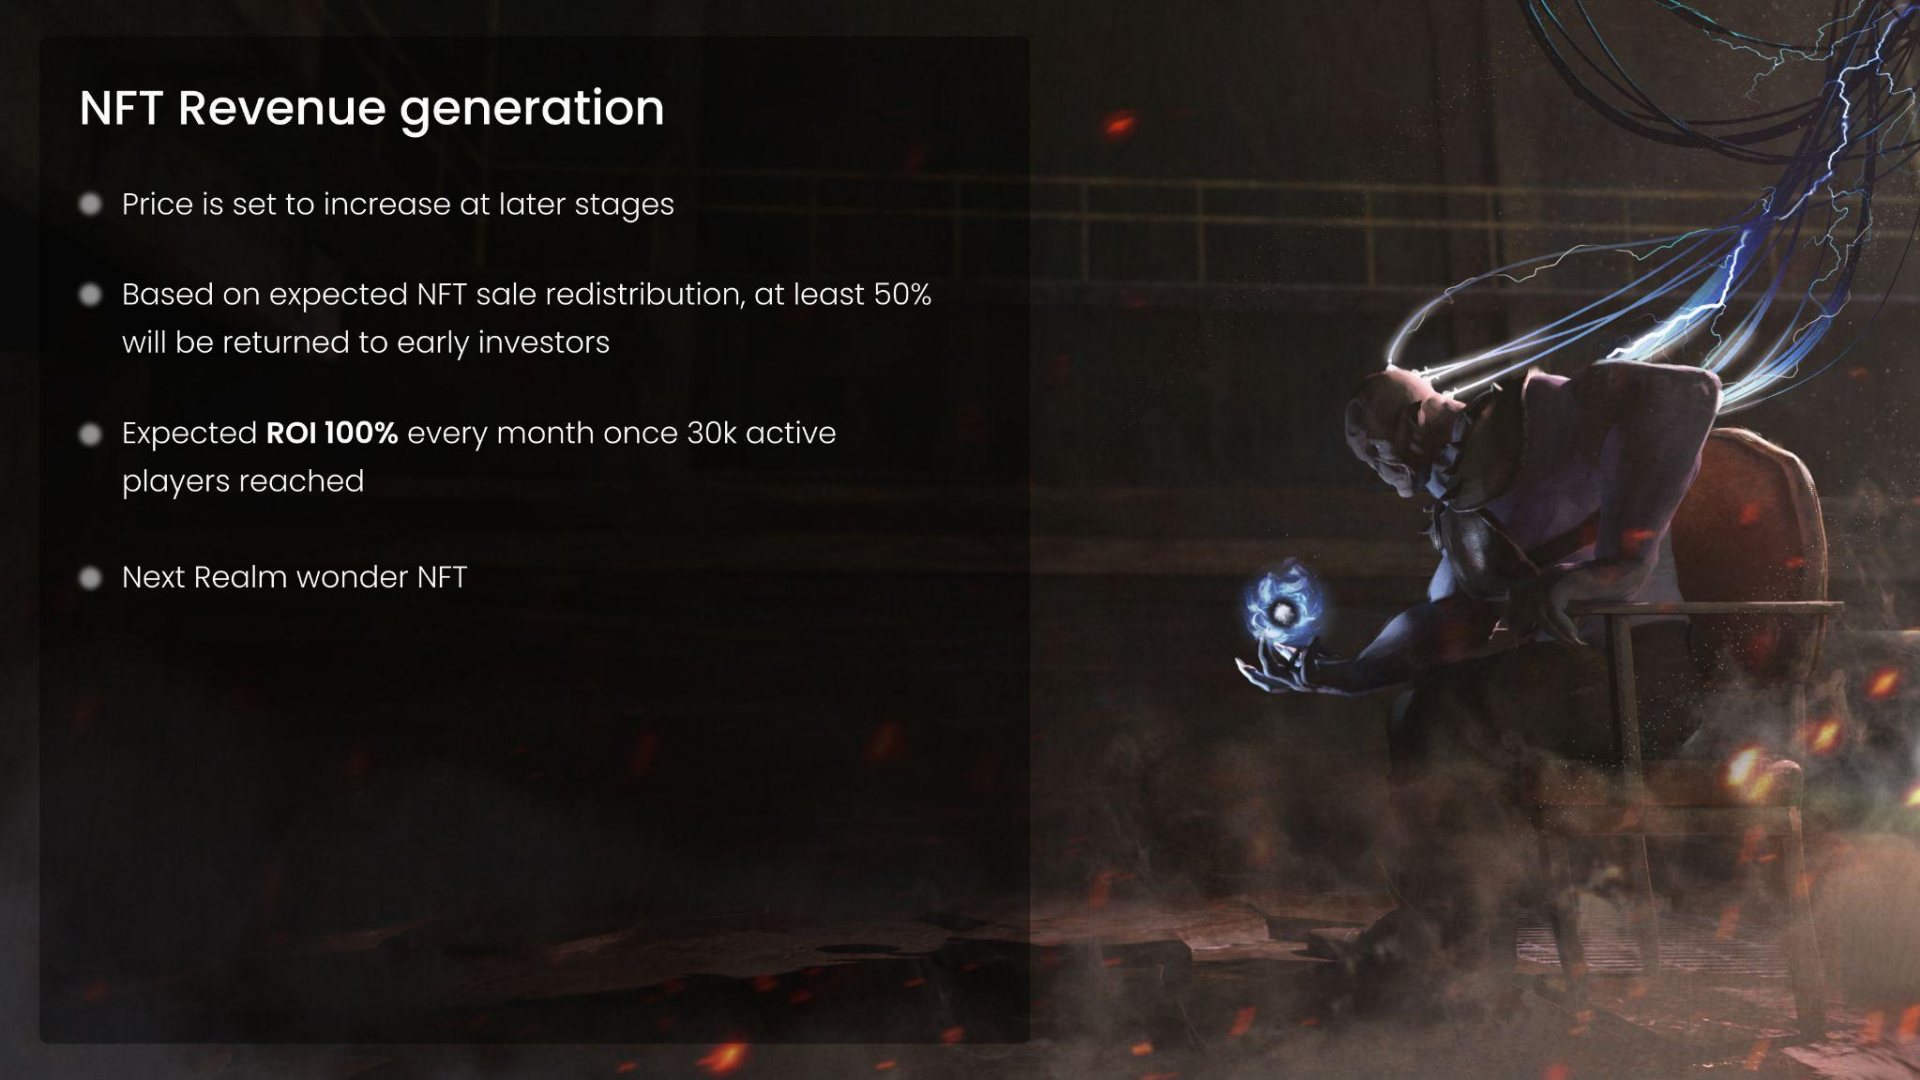
Sell Realm Wonders in auctions

Single-handedly constructed Realm Wonders as well as Founder's NFTs can be sold to other players and investors including all the perks that come with owning the Wonder.



NFT Revenue generation

- Price is set to increase at later stages
- Based on expected NFT sale redistribution, at least 50% will be returned to early investors
- Expected **ROI 100%** every month once 30k active players reached
- Next Realm wonder NFT



Wizards NFT

Utilize Wizards as a workforce

Earn from completing in-game tasks through a Wizard's hands.

Train and unlock Unique Skills

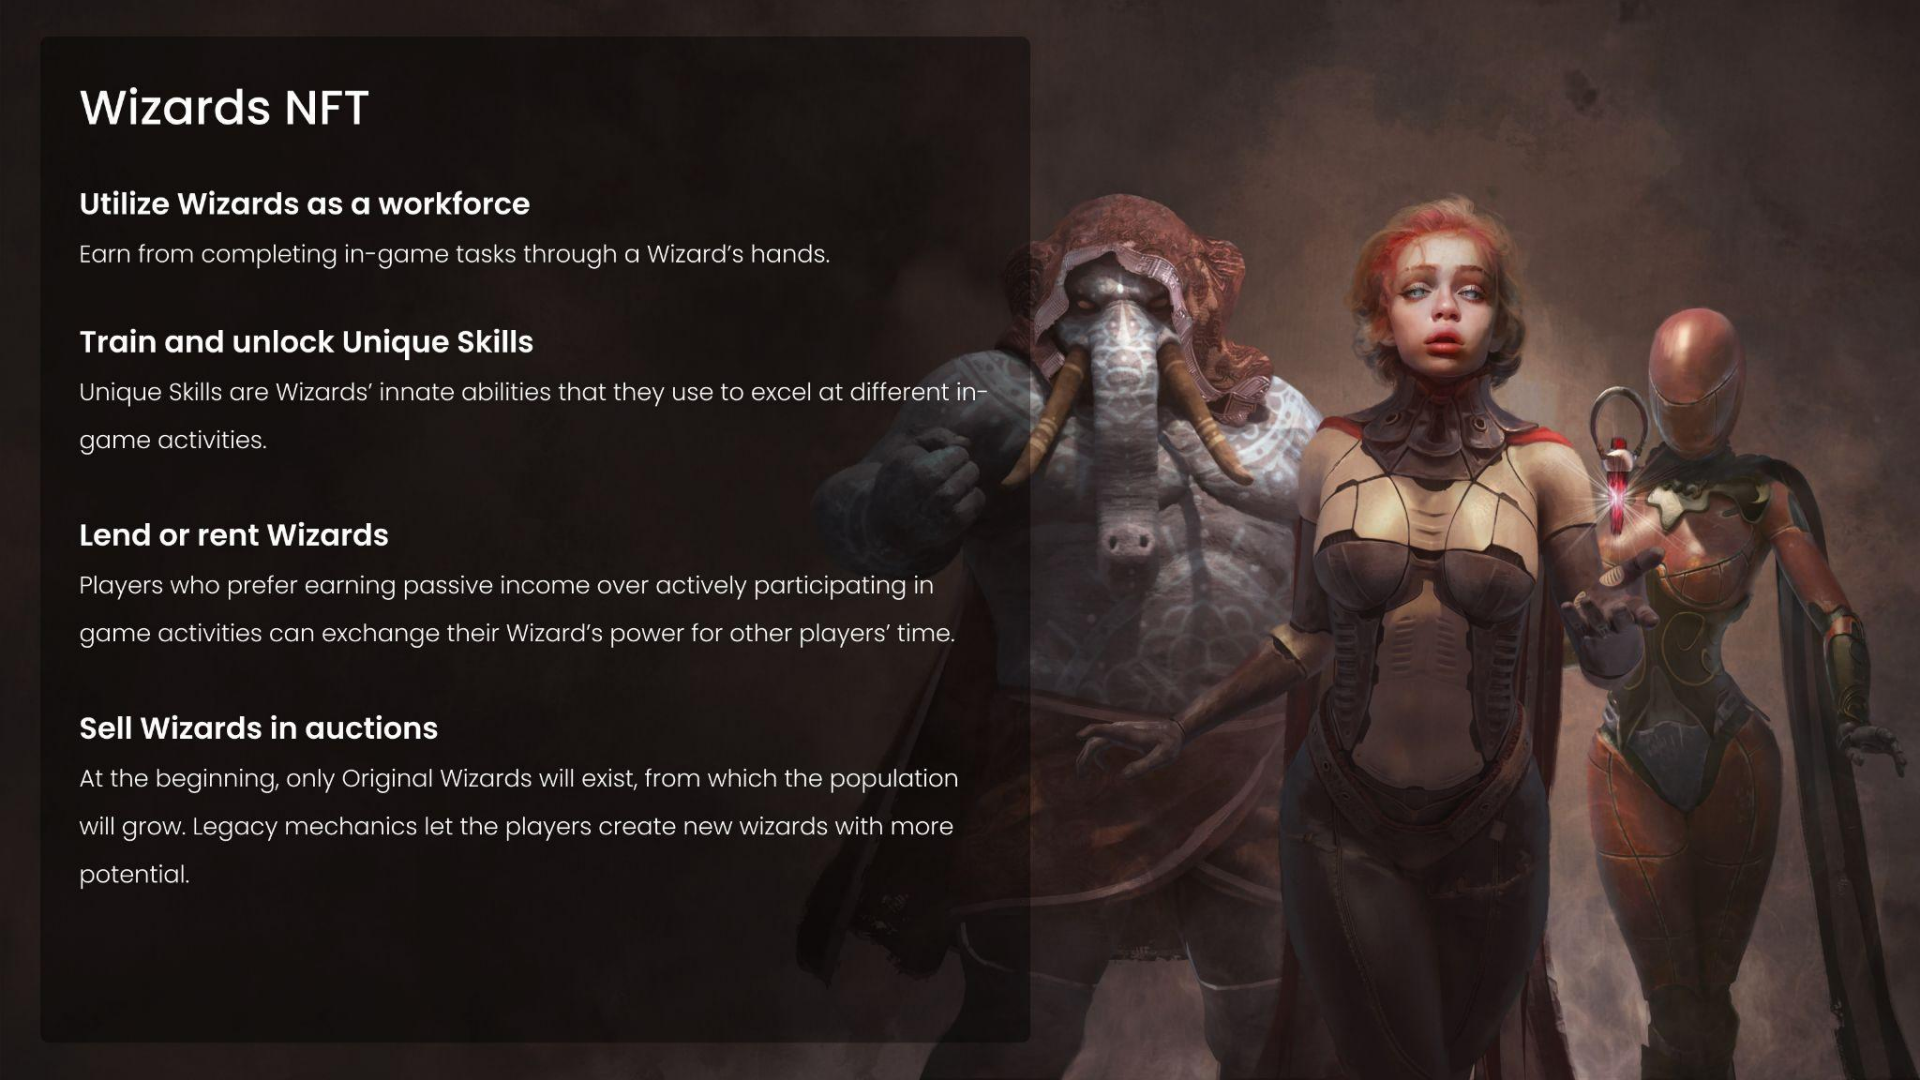
Unique Skills are Wizards' innate abilities that they use to excel at different in-game activities.

Lend or rent Wizards

Players who prefer earning passive income over actively participating in game activities can exchange their Wizard's power for other players' time.

Sell Wizards in auctions

At the beginning, only Original Wizards will exist, from which the population will grow. Legacy mechanics let the players create new wizards with more potential.



Protospell NFT

Protospells - original recipes in the player's Magic cookbook

Keep the power to surpass others

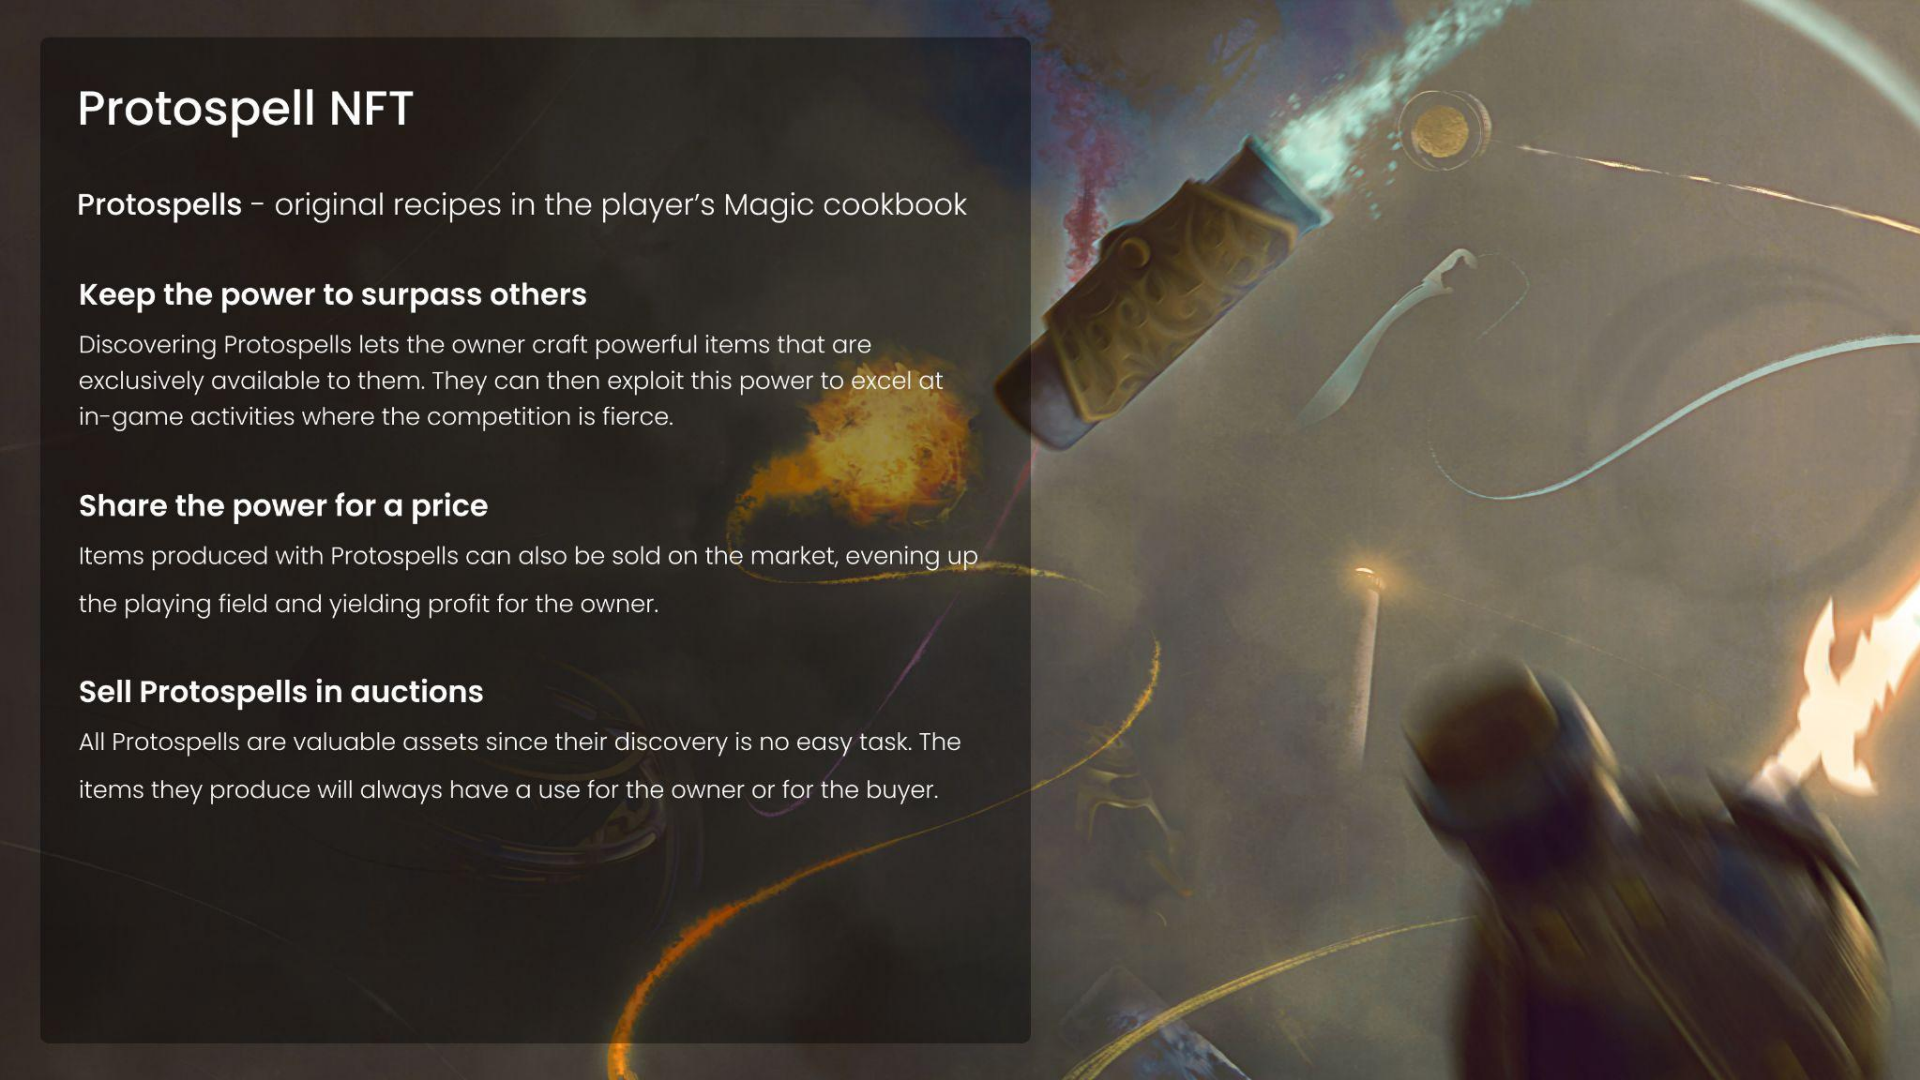
Discovering Protospells lets the owner craft powerful items that are exclusively available to them. They can then exploit this power to excel at in-game activities where the competition is fierce.

Share the power for a price

Items produced with Protospells can also be sold on the market, evening up the playing field and yielding profit for the owner.

Sell Protospells in auctions

All Protospells are valuable assets since their discovery is no easy task. The items they produce will always have a use for the owner or for the buyer.



Wizardia Token Flow

Various fees are collected through game mechanics

- Transaction fees
- Tournaments
- Protospell discovery
- Realm Wonder construction
- Wizard Legacies

Tokens from the vault are distributed back to the game

- Staking
- Quest completion
- PvP and PvE rewards
- Event participation

Wizardia Tokens

	Percent (%)	Tokens	Price ($)	Capital raise
Seed round (closed)	5.00 %	15 M	0.06	$900,000

Roadmap

2022 Q1

- **Launchpad + DEX/CEX Listing**
- Smart Contract Audit
- Staking Program
- 1st NFT sale
- Community 50k

2022 Q2

- Battle Arena game (alpha)
- Tournament system
- 2nd NFT sale
- Community 100k

2022 Q3

- **Listing in Tier 1 CEX**
- Global tournament
- Base building
- Marketplace
- Community 250k

2022 Q4

- Full Game launch
- VR/AR Integration
- Mobile App
- Community 500k

Disclaimer

It is important to understand that you are utilizing the site, app, or smart contracts at your own risk. There may be errors in these products which could cause damage and hurt either yourself or someone else who uses them. We cannot guarantee their safety but will try our best so please think carefully before using them – we can't guarantee perfection, simply strive to get as close as possible to it.

The Site, the App, and Smart Contracts may not be suitable for your needs. We don't represent that everything on the site will suit all requirements, because it isn't possible! We also cannot ensure that your access (or use) is uninterrupted, timely or free from errors in any way whatsoever, either while browsing through pages/content at home using a desktop computer browser. The reason for this is that some jurisdictions do not allow the exclusion of implied warranties in a contract with consumers.

With your involvement, you agree to the inherent risks of doing business online. That being said, we are here for you in that we provide a secure network that protects your information from potential breaches or hackers who want access in order to steal sensitive data (such as passwords and credit card numbers).

Users should always make sure that their private keys are backed up and not stored anywhere unless they're willing to take full responsibility for the consequences. It's also a good idea if you can update personal information (including passwords) as well, as the app and OS regularly fix any security holes in their software. Bright projects, LLC can be seen as an asset that exists only by virtue of its own record maintained on a network. All smart contracts are conducted and occur within this system, where they interact with other app owners to transfer resources between each other based on certain rules programmed into their code.

Wizardia has no control over the smart contracts on the blockchain networks, or any other feature of our platform. We cannot be responsible for losses due to blockchains and electronic wallets used with this game. So even though it's not possible now, these things happen from time to time. Any fund losses may still come up eventually because there is the possibility of problems occurring within the blockchain network, like forks in technology nodes.
